MICRO-GENERATOR RATE

If you have been considering installing a Microgen service, Lakeland REA is happy to announce a special Micro-Generator Rate. This rate provides a fixed price for a specified period of time.

Micro-generation is a small-scale local electricity production, which uses renewable and alternative energy sources. Solar power is the most common micro-generation in Alberta, and you can use the power you generate to offset a portion of your own electricity consumption.

Lakeland REA's **Micro-Generation Rate** is offered at a price of **19 cents per kWh**. It is intended that the start date be April 1 of the current year and the expiry of this offer would be September 30 of the current year.

Please contact the office for more details on this rate.

STABLE RATE

Current Stable Rate Contract is coming to an end April 30, 2021.
